DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 6 and 7, filed 9/5/07, with respect to the rejection(s) of claim(s) 1-19 have been fully considered and are not persuasive. Applicant argues the rod of Lecuyer is non-moveable. However, Lecuyer teaches the rod 23 is held in seat 23' which presses on the membrane 15. Applicant argues Lecuyer does not provide for adjustment of the valve. However, Lecuyer teaches adjustment of the vavle (col. 4, lines 2-5).

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lecuyer et al. USPN 5843013 in view of Hooven USPN 4676772. Lecuyer discloses a valve which can be implanted in the body of the patient for the treatment of hydrocephalus comprising a housing forming a cavity; a separating membrane 15 mounted at its periphery on the housing, provided with an orifice 31 and delimiting within the cavity an upstream chamber 16 and a downstream chamber 17; the housing forming in the upstream chamber a seat 23 for the membrane 15; the seat surrounding the orifice; a rod 23 with a variable cross-section arranged so as to enter the orifice

Art Unit: 3761

axially; means of supporting the rod 21 (col. 1, lines 5-22). Lecuyer is silent on the drive means and the adjustability of the valve. Hooven et al. teaches a magnetically adjustable valve where a magnetic field causes rotation of a member, which in turn drives a movable portion of the valve. Pivot point 74 allows the magnetic wrench to rotate relative to the interior surface of the cap, which renders the valve adjustable. The adjustable valve system of Hooven allows for non-invasive adjustment of the valve for pressure relief. One having ordinary skill in the art would have been motivated by the teachings of Hooven to modify the invention of Lecuyer with a magnetized motor and cam arrangement to provide an adjustable valve for the benefits of allowing the health care profession to non-invasively determine the relative adjustment setting of the implanted valve. Hooven/Lecuyer discloses levers 100,101, 102, 103 (Hooven Figure 3).

Conclusion

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3761

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacqueline F. Stephens whose telephone number is (571) 272-4937. The examiner can normally be reached on Monday-Friday 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tanya Zalukaeva can be reached on (571) 272-1115. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
